This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

JOINT RESOLUTION OF CONGRESS

In relation to the International Industrial Exposition to be held in Paris in eighteen hundred and seventy-eight.

WHEREAS, the United States have been invited by the Republic of France to take part in a Universal Exposition of the productions of agriculture, manufactures, and the fine arts, to be held in Paris in eighteen hundred and seventy-eight: Therefore,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That said invitation is accepted, and that the Governors of the several States and Territories be, and are hereby, requested to invite the people of their respective States and Territories to assist in the proper representation of the productions of our industry, and of the natural resources of the country, and to take such further measures as may be necessary in order to secure to their respective States and Territories the advantages to be derived from this beneficent undertaking.

SEC. 2.—That the President, by and with the ad-

vice and consent of the Senate, shall appoint a Commissioner-General to represent the United States in the proposed exposition, and, under the general direction of the Secretary of State, to make all needful rules and regulations in reference to the contributions from this country, and to control the expenditures incident to the proper installation and exhibition thereof, and to the preparation of the reports on the exposition; and that the President may also appoint twenty additional commissioners, no two of whom shall be appointed from any one State, of whom three shall be practical artisan experts, three shall be skilled representatives of commerce and manufactures, and four shall be practical agriculturists, nine shall be scientific experts, corresponding to and specifically assigned to report upon, the nine groups into which the exposition will, under the official regulations, be divided, and one who shall be assistant commissioner-general, and shall perform the duties of commissioner-general in case of his death or disability, and shall report upon the exhibition at large, and the general results thereof; that the allowance to said commissioner-general for salary and personal expenses shall not exceed five thousand dollars for his whole term of office; and the allowance of the twenty additional commissioners for salary and personal expenses shall not exceed twelve hundred dollars each, not including such clerical service as may be allowed by the commissioner-general, which shall not exceed fifteen thousand dollars; and the Governors of the several States may nominate and the President appoint two honorary commissioners from each of the several States, and the President may appoint twenty-four additional honorary commissioners, among whom there shall be at least one resident of

each of the Territories of the United States, which said honorary commissioners may report upon such special subjects as the commissioner-general may direct, and shall serve without pay or other expense to the United States. *And provided further*, That in case the authorities of any State or Territory shall appoint a commissioner or commissioners to represent the interests of such State or Territory at said exhibition, said commissioner or commissioners so appointed shall have the same status in the commission as the honorary commissioners provided for herein, but shall not be entitled to either pay or compensation out of the money hereby appropriated. *Provided always*, That no person appointed by virtue of this resolution shall have any pecuniary interest, directly or indirectly, in any article exhibited for competition, or act as the agent for any exhibitor. And not more than one of the commissioners entitled to compensation, nor more than five of the honorary commissioners shall be appointed from any one State or Territory.

SEC. 3.—That the President be authorized, in his discretion, to assign one or more of the public vessels to transport to and from France, free of cost, under regulations to be prescribed by the commissioner-general, such articles as may be offered for exhibition by the citizens of the United States.

SEC. 4.—That in order to defray the necessary expenses above authorized, and for the proper installation of the exhibition, and the expenditures of the commissioner-general made under the direction of the Secretary of State, and with his approval, and not otherwise, there be, and hereby is, appropriated, out of any money in the Treasury of the United States not otherwise appropriated, the sum of one hundred

and fifty thousand dollars, or so much thereof as may be necessary for the purposes herein specified, which sum shall be expended under the direction of the Secretary of State; and out of such amount the Commissioner of Agriculture is hereby authorized to collect and prepare as far as practicable, and with as little delay as possible, suitable specimens of the agricultural productions of the several States and Territories of the Union for exhibition at the Paris Exposition.

SEC. 5.—That it shall be the duty of the Secretary of State to transmit to Congress a detailed statement of the expenditures which may have been incurred under the provisions of this Resolution, together with all reports called for under Section 2 of this Resolution, which reports shall be prepared and arranged with a view to concise statement and convenient reference.

Approved, December 15, 1877.

OFFICIAL INSTRUCTIONS.

DEPARTMENT OF STATE,

WASHINGTON,

March 12th, 1878.

UNDER the Joint Resolution of Congress, in relation to the International Industrial Exposition to be held in Paris in 1878 (approved Dec. 15th, 1877), the Honourable RICHARD C. MCCORMICK has been appointed Commissioner-General to represent the United States at the said Exposition, and, under the general direction of the Secretary of State, to make all needful rules and regulations in reference to the contributions from this country, and to control the expenditures incident to the proper installation and exhibition thereof, and to the preparation of the reports on the Exposition.

The rules and regulations which he has already prepared and issued are approved, and the following general directions are prescribed:

The supervision and management of the Exhibition upon the part of the United States, and the control of all interior and exterior space allotted for the same by the

French authorities, will be exclusively in the hands of the Commissioner-General.

The selection of superintendents, clerks, and all employés to be paid out of the Congressional appropriation, will be left to him ; and all persons employed in connection with the United States department at the Exposition by Exhibitors, or in any way occupied upon the premises, will be under his direction.

The Assistant Commissioner-General will perform the duties of the Commissioner-General in his absence, and will also report upon the Exposition at large, and the general results thereof. Such report must be furnished to the Department of State by May 1st, 1879.

The Additional Commissioners appointed as practical artisan experts, and those appointed as skilled representatives of commerce and manufactures, will undertake the work of examining and reporting upon such classes in the grouping of the Exposition as may come within the particular line of their knowledge and experience.

The Additional Commissioners appointed as practical agriculturists, will undertake similar duties in connection with the agricultural and horticultural departments of the Exposition.

The Additional Commissioners will be entitled to no compensation or allowance beyond the sum of twelve hundred dollars each provided by Congress, nor will they be paid the whole or any part of said sum unless they report to the Commissioner-General, in Paris, and remain there in the discharge of the duties assigned to them until formally relieved by him, and in all matters in connection with the Exposition they will act under his direction.

In the Main Exposition Building, or elsewhere, as it may prove most convenient, an office will be provided

for the Additional Commissioners, and a suitable person placed in charge of it as a general Secretary.

Necessary clerks for the Additional Commissioners, not to exceed one for two Commissioners, may be provided by the Commissioner-General during the time said Commissioners remain at the Exposition in the discharge of official duty, or during so much of said time as the services of clerks may be required.

The Commissioner-General may call meetings of the Additional Commissioners for any purpose, at his discretion, and preside at the same, or designate an Additional Commissioner who shall take the chair.

The Commissioner-General may designate any of the Honorary Commissioners to report upon special subjects, but in each instance he will see that they investigate and report upon subjects to which the Additional Commissioners formally assigned by the President to the nine groups (into which the Exposition under the French regulations is divided), will be unable to give attention.

The Commissioner-General is not authorized, under the resolution of Congress, to provide Honorary Commissioners with clerical assistance, or to assume any expense whatever upon their account.

The reports upon inventions and the various products displayed which are most advanced in the sciences, in the arts and in the industries, are expected to give a clear and practical description of such inventions, and of the methods and processes connected with such products.

Each report will be made upon the responsibility of the person charged with it, and he will sign his name to it.

The reports will be transmitted to the Department of State with as little delay as possible after the close of the

Exposition—certainly not later than the first of January, 1879.

They must be in form fitted to transit to Congress for publication, subject to arrangement with a view to concise statement and convenient reference.
